

From Airlangga to the Archipelago

The IMPHO national physiology quiz was birthed in 2017 after the 14th IMSPQ 2016 that was hosted in Yogyakarta. The lecturers in Airlangga University together with their student committee have successfully completed 3 IMPHO events before COVID years. After a gap in 2020, the first Online IMPHO resumed in 2021. IMPHO has been a gathering ground for medical students from across the extensive Indonesian archipelago. It has stimulated interest in learning and teaching Physiology. The academic network and friendships formed during IMPHO have provided a continual platform for Online Zoom discussions among Indonesian Physiology teachers with the Quiz Master of the IMSPQ.
